

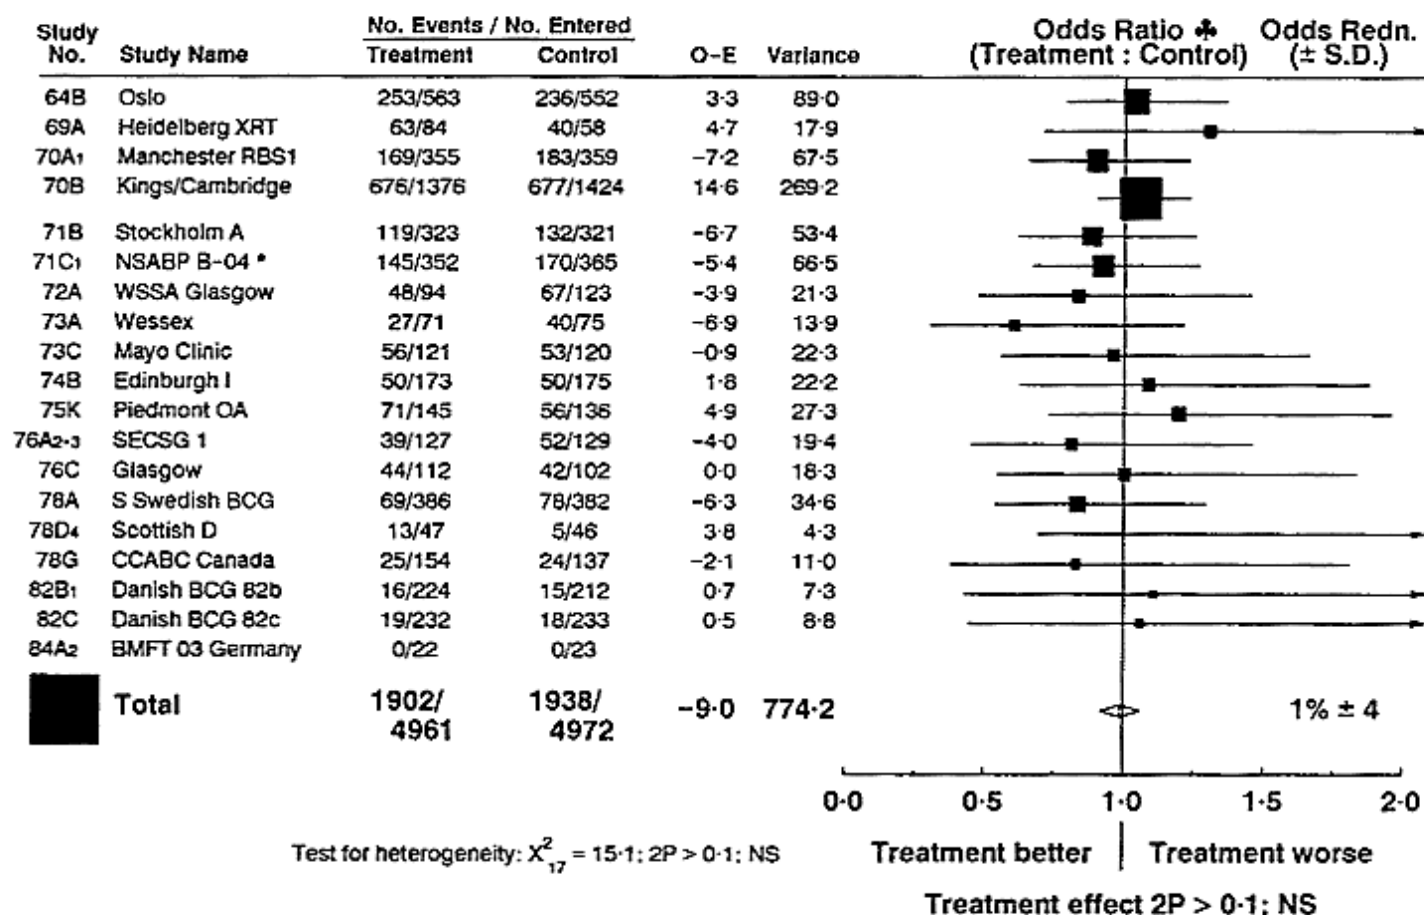

Fig. 1M. Example of graphic display of an overview of 19 trials: MORTALITY in all available unconfounded randomized post-mastectomy radiotherapy trials**

* Published results (3), since individual patient data not available.

** Data from about 10 randomized radiotherapy trials that began before 1.1.1985 were not available in 1985 and are not included here. Data from one large trial (Manchester Christie 49B) have been excluded because of non-standard randomization.

\clubsuit 95% confidence intervals for overview and 99% for individual trials.
